

The Archdiocese of Oklahoma City needed to be able to host video conferencing meetings across the state. The board room has a large square conference table which made getting even microphone coverage difficult.

A TeamConnect2, mounted in the middle of the false ceiling, was the perfect solution. It picks up the entire room with even coverage.

The TeamConnect2, paired with an Audinate ADB-USB-AU2X2 and a Lumens VC-B30U PTZ camera, was a perfect high quality and affordable solution.

Parts used:

- **Samsung QB75R**
- **Sennheiser TeamConnect2**
- **Lumens VC-B30U**
- **Audinate ADP-USB-AU-2X2**
