

The first floor consists of a combination of 27 digital menu boards, as well as digital signage displays that are remotely managed with Samsung MagicInfo platform.

The main dining area has an audio system with 6 zones of audio allowing for well distributed sound. Wireless microphones and an input plate make this area the perfect space for presentations.

A large projector and screen were placed in the private dining/multipurpose area. It can operate independently or be utilized as an overflow for the main dining area. All audios levels can be remotely managed.

The upstairs are contains Human Resource Offices and other Campus enterprises. They have 7 conference rooms from private huddle spaces to premium video conferencing. Sound masking in HR insures private conversations.
